bonify

Bonus decisions.
In focus.

Review reward recommendations against your rules, budgets, and player protections.

01 **Bring the context together**

Connect anonymous player activity with reward history and eligibility.

02 **Apply your reward policy**

Set permitted rewards, limits and player protections for each workspace.

03 **Review the recommendation**

Inspect the proposed reward, supporting evidence and expected cost.

Your platform keeps approval and delivery

Bonify recommends within your configured policy. Your platform approves and delivers the reward, then reports usage and results. Model output does not credit player balances.
